What we do

We primarily focus on, Civil (Construction) and Surveying Services, Geotechnical Services, Exploration Services and drilling (Diamond core drilling and percussion drilling), Ground Water Services, Geophysics services, Environmental Management, Acquisition of prospecting and mining rights and licenses.

TECHNICAL PROPOSAL

The primary aim of this technical proposal is to develop a basic and comprehensive text that emphasizes Capacity, Quality Control, Time Management, Guarantee, and Safety.

We believe in providing quality services all times at competitive prices, an important issue in the contemporary business world. Hence as a client, you will always value the importance of your money for expected quality service.

We offer Consultation and Project Management on following:

- Drilling Services (Surface and underground drilling)
- Dolomite and Geotechnical Services
- Geological Services
- Geohydrological Services
- Civil and Construction Works (NHBC Accredited)
- Water and Sanitation Projects.

Our excellence and competencies are shown on the above-mentioned services as we consult and manage them.

BACKGROUND AND **INTRODUCTION**

Mshandukani Holdings was formed in terms of company act 1984 of South Africa. The company was established in 2008 as a CK and converted to (Pty) Ltd in 2010. The ideal formation of this company is to re-enforce the need to achieve “non-racial integrated society through sustainable development, wealth creation, poverty alleviation and equity”. The company is acting as catalyst between all spheres of government and cross Sectors to provide quality and cost effective service delivery, complying with corporate governance requirements and promoting black economic empowerment. Mshandukani own drilling rigs for dolomite and geotechnical investigations, exploration works and groundwater boreholes (Diamond core drill rigs x2 and percussion drill rigs x3).

The company also two offices and a workshop in Centurion; and has Trucks and LDV's bakkies to carry out duties and transport personnel to work. We have full trained and competent personnel to conduct work in compliance with HSE and professional indemnity and public liability insurance to cover all work and business conducted with clients.

Mshandukani Holdings is a 100% black owned entity rated at Level 1 with BEE scoring.

IMPLEMENTATION STRATEGY

Capacity:

- The company has a solid infrastructure, with experience and dedication of workforce (employees). Reliability and prompt service is our competitive advantage hence we have enough resources for any project.
- As experienced company on different trades and projects, we understand that, waiting times are normally caused by available capacity being unable to accommodate a number of projects at a given moment, due to unavailability of resources.
- The company normally assign Project Managers for specific projects on site who oversee and always ensure that we comply with general conditions of contract and maintain Service Level Agreement with the Client. That particular person also responsible for quality control and time management.

IMPLEMENTATION STRATEGY

[Continued]

Time Management & Quality Control

- In line with the Client Scope of work and expectations with conjunction of our effective delivery, strategies will prevent to have waiting time.
-
- It would remain our prime responsibility that we honour Client that their needs are met within the parameters of time, cost and quality by so doing our company values and capacity statement would have been realised.
-
- We define quality as the degree of excellence achieved and the achievement can be only realised when a product or service performs satisfactorily. This aspect play crucial role on business because you might have all other resource in place, but without quality you won't succeed hence our company have right employees with experience, skills and competency to add value on quality of services we offer, because Clients insist on the value of their money.
-

IMPLEMENTATION STRATEGY

[Continued]

Guarantees

- To give assurance to the Client that we mean business and committed to provide the Client with top quality services that is efficient, convenient and economic with adherence of Client General Conditions of contract.
- As to honour our company values and Client expectations, we would like to sign Service Level Agreement with the Client. As a pledge from us, that we practice what we preach.

Safety Plan

- People tend to forget safety information while they are exposed to hazard every day, the safety of our employees come first therefore we provide our personnel with information on the hazards involved in their jobs govern by the occupational Health and Safety Act (Act 85 of 1993).
- We inform and train all our personnel who will be exposed to hazards in their work, about the dangers and safety measures associated with their work. This process applies to all, irrespective of post level or academic qualifications, different hazardous equipment or 3 substances can have quite different effects and safety measures to prevent injuries and health effects.
- Assessment and monitoring the health risks potential exposure of workers and implement control measures to prevent those risks or to reduce them to acceptable levels is our prime objective.

MISSION, VISION & **VALUES**

MISSION

In support of our core values, vision and future business path. We believe in making a difference in people's life by contributing to the national goals of poverty alleviation and job creation.

VISION

To become a leading and dynamic player by contributing to an economical goal of the country, by sustaining growth and prosperity.

VALUES

Company values are built on:

- Accountability
- Dedication
- Transparency
- Fairness • Discipline
- Respect and humanity

COMPANY OBJECTIVES

our objectives in this quest are:

- To give all clients better service, means improving works systems, being more responsive in attending to client's needs, delivering quality every time and eliminating waste.
- To create the pockets of excellence.
- Reduce overall cost of service delivery.
- Capacity and ability to compete robustly.
- To promote Black Economic Empowerment.
- To comply with Service Level Agreements

DIRECTORS AND MANAGERS PROFILES

Mr Mashudu Vincent Shandukani **Managing director**

He Holds Degree in Geology and Environmental sciences, He previously worked as a Geologist for different mining companies, he was also part of the Bombela CJV (Gautrain Project) as an Engineering Geologist/ Geotechnical Engineer, was also involves Eskom hydropower scheme in KZN Ladysmith as Engineering Geologist. His experience covers Geotechnical investigations for Roads, Bridges, Railway lines, tunnels, Dams, structures (Low costs housing, shopping centres, offices, filling stations, etc.); Sinkhole Rehabilitation and dolomite investigations; Drilling and Geohydrological services; and Civil and Construction works. He is the Founder of Mshandukani holdings. He is an affiliated member with GSSA, SAGA and SACNASP.

Mrs Pretty Shandukani **Managing Director**

She holds a Diploma in Civil Engineering with Cape Peninsula University of Technology and a Btech in Construction Management. She has previously worked for Bombela CJV (Gautrain project) as a Junior Design engineer and Arcus Gibb as Junior Design Engineer for the Ingula pump storage project; she has also worked as Site Engineer for Power Group of Company and for Rainbow Construction before joining the company. She did consulting and Project management work at Caswell Mthombeni Consultancy for the EPWP Projects (Department of Public works) as a Project Manager.

Mrs Claudia Khangale **H.O.D Geotechnical**

She holds an Honours Degree in Mining and Environmental Geology from the University of Venda. She is a registered Professional member of the South African Council for Natural Scientific Professions Registration number: (Pri. Sci. Nat.) 117031 with more than 10 years post graduate experience in the geotechnical field and have worked for various and geotechnical projects in South Africa and currently working as a Dolomite/geotechnical Consultant for City of Ekurhuleni.

Mr Mulalo Rammbuda **Safety Manager**

Mulalo Rammbuda is an experienced and qualified Safety & Risk Practitioner specializing in the field of health & safety management she is also register with SACPCMP and SAIOSH health and safety bodies. She has experiences in civil and construction works, safety management with particular involvement in systems development and training. She has qualifications in the following: Advanced Safety Management; HIRA (Hazard Identification & Risk Assessment) and she has experience in ISO 45001, ISO 9001 and ISO 14001 Implementation. Her experiences include compliance in Refurbishment student residences in TUT Ga Rankuwa campus and Construction of multi-purpose centre

TECHNICAL **SERVICES**

It is strategically important to company that, service delivery be realised and fully implemented in order to satisfy client's needs. Hence, we ensure our services come to fruition within the parameters of cost, time and quality. In terms of Marketing, The company intend to employ different kinds of marketing techniques, which will improve to capture the gap of our market share.

TECHNICAL **SERVICE**

1. SURFACE EXPLORATION DRILLING

**DRILLING OF WATER
BOREHOLES**

**DRILLING OF WATER
BOREHOLES**

We have exploration rigs XY 44, Secco's and Komakio drill rigs which can drill up to 1000m, we have a complete team of well-trained competent personnel who carry out the works in a safe manner, we are able to drill vertical and inclined holes, our drilling crew are able to do core orientation as well.

TECHNICAL SERVICE

[Continued]

2. UNDERGROUND DRILLING

The company have ventured into underground drilling, we have Kempe drills and meter eater that can do directional and horizontal drilling from 35deg- 90 deg, our drill rigs are mounted with Electrical motors which works using at least 75 Kw electricity supply or Generators. Our drill rigs can drill an average of 40 m- 60m per 12 hour shift, we can drill with NXT, PQ, BQ, BQ3, TNW and other sizes.

GEOTECHNICAL PROJECTS [Additional]

- Geotechnical investigation and Dolomite studies for Ekurhuleni municipality (Dept of Roads and Transport, July 2016) Geotechnical investigation for road centreline survey at Eskom Kusile coal storage facilities.
- Geotechnical investigation and slope design for Dumbe Transnet freight rail in Paulpietersburg (Feb 2015)
- Drilling of Pizzomonitoring holes and Dolomite stability reports for the entire Ekurhuleni Municipality (June 2016)
- Geotechnical Investigation for Inner City Centre Rail Project- Johannesburg Development Agency (October 2013)
- Geotechnical investigation of MPI pipe racks in SASOL Secunda January 2013)
- Geotechnical investigation for Randwater pipe lines (November 2012)
- Geotechnical investigation of Phomolong Primary School (Infratechnology- August 2012)
- Geotechnical investigation and adaption of as built design for Bombela CJV- Gautrain projects (Above ground works and underground works, March 2012)
- Geotechnical investigation and foundation design for Roads and tailing dams in Barick Lunwana mine Zambia (May 2012 till date)
- Geotechnical investigation for foundation design of Finsbury sport ground in Randfontein (Dikelellong Cons. Engineers may 2012)
- Geotechnical Investigation for foundation design of road construction in Musina, Limpopo province (May 2012)

GEOTECHNICAL PROJECTS [Additional]

- Geotechnical investigation for Re-gravelling of Bochabela road, Capricorn District (SGL engineers March 2012) 27
- Geotechnical Investigation for Regravelling of Leolo road, Sekhukhune (Akhatech Engineering Consultants, September 2011)
- Geotechnical investigation for Ikemeleng road construction, Rustenburg (Tshawe Infrastructure) – July 2011
- Geotechnical investigation for foundation design of VOV Internal Church, Ladysmith Jan 2011
- Geotechnical investigation and foundation design for 17th Reformer in SASOL Technology Refinery Plant (Linde AG & Grinaker Ltd – Feb 2010)
- Geotechnical investigation of SASOL EPU 5 Plant (Linde AG & Grinaker-Ltd- May 2010)
- Geotechnical investigation of SASOL CTFE Plant with Grinaker-LTA and ILIFA Africa (July 2010)
- Geotechnical Investigation of road centreline survey (Rustenburg Municipality – Aug 2010)
- Geotechnical investigation and foundation design for shopping centre and fuel station (QwaQwa – Aug 2010)
- Geotechnical investigation and foundation design for warehouse (Siyabuswa – Aug 2010)
- Geotechnical investigation and foundation design for old age home (Randfontein – Aug 2010)
- Geotechnical investigation and foundation design for Khuma Reservoir in Randfontein (Pule Rasimong Consultants- October 2010)
- Geotechnical, rezoning and Flood line survey for RDP houses in KZN – Ladysmith (Cymax Construction, Mandlethu and Mgitane Construction – November 2010 till May 2011)

2. GEOLOGICAL PROJECTS

Client	Project Description	Project Value	Completion Year	Contact Details
Exxaro Mine	Percussion Drilling	R1.5 million	December 2018	Bokamoso Drilling Thomas Ngobeni – 061 48 2929
